

At Veson Nautical, client value is the star that guides all that we do. That's why we develop and release more than 500 new features each year to meet the evolving needs of our vast, global client community. Once released, many of these capabilities are automatically added to our dynamic, cloud-native platform where they can benefit clients.

## Carbon Tax Support and Reporting

Carbon tax regimes are coming, whether it is through the prospective EU Emissions Trading System (EU ETS), the IMO, or another structure. VIP Chartering now calculates CO2 adjusted P&L and TCE to help your pre-fixture team prepare for these new regulations, and VIP Analytics includes additional reporting parameters to guide your sustainable business practices.

### Enhanced Modules

 **CHARTERING**

 **ANALYTICS**

### Do these enhancements apply to you?

Ask yourself these questions to determine how your organization will benefit from these additions to the Veson IMOS Platform:

- ✓ Do you book business that falls within the EU ETS?
- ✓ Are you pricing deals differently based on CO2 emissions?
- ✓ Are you analyzing the results of your sustainability initiatives?

## The Challenges

In anticipation of new regulations, carbon tax provisions are increasingly included in new freight contracts.

1

## The Features & Benefits

In VIP Voyage Estimator, you can account for these costs and calculate the adjusted P&L and TCE, so that you can accurately price business.

Many organizations are instituting sustainability targets for new business.

2

With CO2 cost details available for estimate reporting and From/To Country parameters added to the Voyage Leg Summary, VIP Analytics gives you added insight into your sustainable practices.

Take advantage of the latest platform features.
