

At Veson Nautical, client value is the star that guides all that we do. That's why we develop and release more than 500 new features each year to meet the evolving needs of our vast, global client community. Once released, many of these capabilities are automatically added to our dynamic, cloud-native platform where they can benefit clients.

## Exchange Rate Date Defaulting Rules

### Enhanced Modules

Exchange Rate Date Defaulting allows VIP admins to configure rules reflective of accounting practices to default exchange rate dates to contextual dates related to contracts, voyages, and other objects.

### Do these enhancements apply to you?

Ask yourself these questions to determine how your organization will benefit from these additions to the Veson IMOS Platform:

- ✓ Does your organization use contextual exchange rates?
- ✓ Are your users often updating the default exchange rate date?

### The Challenges

### The Features & Benefits

It can be difficult for users to remember the correct exchange rate dates to use for all the different invoice types.

1

Define contextual exchange rate date defaulting rules for different invoice types.

Sometimes exchange rate dates should be different per line item on a single invoice.

2

Some invoice types offer defining those exchange rate date defaulting rules for individual line items.

Take advantage of the latest platform features.

To learn more about these capabilities and others, [read our latest release notes](#).
