

At Veson Nautical, client value is the star that guides all that we do. That's why we develop and release more than 500 new features each year to meet the evolving needs of our vast, global client community. Once released, many of these capabilities are automatically added to our dynamic, cloud-native platform where they can benefit clients.

Ad Hoc Voyage Journaling

Ad hoc journals previously could not be created and allocated to the Voyage P&L, leaving those with company-wide balances unable to be allocated to particular voyages via journal entries.

Enhanced Modules

Do these enhancements apply to you?

Ask yourself these questions to determine how your organization will benefit from these additions to the Veson IMOS Platform:

- ✓ Does your client have company wide balances that they transact that then need to be allocated to voyages on an as needed basis, such as war risk insurance?
- ✓ Does your client use the full Financials module?

The Challenges

Accountants need to be able to create journals that will transfer amounts from a balance sheet account directly down to a voyage and have it reflected on the Voyage P&L without it causing any issues or preventing month end closing.

1

The Features & Benefits

With Ad Hoc Voyage Journaling, the ability to select a voyage on a manually created journal and have those line items that point to P&L accounts displayed on the corresponding Voyage P&L has been added to VIP.

Ad Hoc Voyage Journaling allows an organization to properly capture and report on the P&L of a voyage within VIP and prevents them from having to reconcile certain expenses in a separate system.

Take advantage of the latest platform features.
