VESON
NAUTICAL

At Veson Nautical, client value is the star that guides all that we do. That's why we develop and release more than 500 new features each year to meet the evolving needs of our vast, global client community. Once released, many of these capabilities are automatically added to our dynamic, cloud-native platform where they can benefit clients.

New Fleet Map

The new VIP Fleet Map collects data from all sources connected to VIP, including AIS data from Oceanbolt, and displays the latest known vessel positions, including important contextual information such as cargos aboard and voyage status. Through new, enhanced filtering you can instantly get a bird's eye view of your fleet, monitor individual vessels and cargos, and make quick, data-backed decisions in the case of an operational emergency.

Enhanced Modules

OPERATIONS

Do these enhancements apply to you?

Ask yourself these questions to determine how your organization will benefit from these additions to the Veson IMOS Platform:

✓ Are you looking for an easy, visual, way to have the bird's eye view of your fleet to take optimal voyage decisions?

✓ Do you need to take swift action when a voyage is deviated, causing delays to the ETA?

✓ Are you looking to avoid sending vessels to an already congested port?

The Challenges

	The Features & Benefits
Knowing exactly where the vessels in your fleet are at all times, having to combine data from different sources.	**1** Ability to create and save fleets through filters, and get the updated position data from AIS and activity reports upon opening the map.
Visualizing past and future projected vessel itineraries.	**2** Upon clicking on the vessel, both the past itinerary and the future projected ones are displayed.
Seeing bunker prices at upcoming ports.	**3** BunkerEx prices viewable by hovering-over the port.

The Challenges

Having to look at a vessel on a map, then go find the voyage in VIP.

Knowing exactly where the vessels in your fleet are at all times, having to combine data from different sources.

Seeing how your vessel itineraries overlap with ECA and Piracy Zones.

The Features & Benefits

4 Easily access the voyage information in VIP directly from the map.

5 Ability to create and save fleets through filters, and get the updated position data from AIS and activity reports upon opening the map.

6 Turn on the ECA and Piracy zone layers in the map to view how your vessel itinerary overlaps.

"Maintain an on-the-ball focus – this should be the mantra for any users of complex applications. This means centralizing your efforts to avoid hopping between different windows and applications as much as possible. The new Fleet Map is a promising integration that allows us to access handy, up to date information plotted nicely into the same working environment as the rest of our operating and fixing processes. Bunker indications are very welcome! In summary, we appreciate the Fleet Map enhancements and we're looking forward to next fine tuning."

— Paolo Vaccaro, Head of Operations
d'Amico Shipping Singapore Pte. Ltd.

Take advantage of the latest platform features.
