At Veson Nautical, client value is the star that guides all that we do. That's why we develop and release more than 500 new features each year to meet the evolving needs of our vast, global client community. Once released, many of these capabilities are automatically added to our dynamic, cloud-native platform where they can benefit clients.

Enhanced Estimated Demurrage

Accurate estimated demurrage cost from estimate to voyage.

Enhanced Modules

☒ CHARTERING

⬤ OPERATIONS

Do these enhancements apply to you?

Ask yourself these questions to determine how your organization will benefit from these additions to the Veson IMOS Platform:

✔ Does your client want to anticipate Port Congestion manually or from a Webhook to create an accurate Estimated Demurrage?

✔ Do you currently manually adjust the Estimated Demurrage?

✔ Are users required to adjust Estimate and Voyage Demurrage Costs so values match?

Features & Benefits

- Automated Estimated Demurrage cross-module solution.

- OceanBolt, PortLog, or manually-entered port congestion data will flow from Estimate to the Voyage, creating P&L continuity.

- Increased Estimate accuracy on the Voyage and removes the need for manual input.

Take advantage of the latest IMOS Platform features.

To learn more about these capabilities and others, read our latest release notes.
