

CAPABILITY SPOTLIGHT

LAYTIME
CALCULATOR**What it Is**

The Laytime Calculator, built-in to the Veson IMOS Platform, helps you effectively track and measure activities that contribute to demurrage, leveraging existing system inputs from the contract and Statement of Facts to streamline this process.

Why it Matters

Demurrage can accrue to have a significant financial impact on any voyage, and uncertainty around port activities can lead to disagreements and negotiations over demurrage owed. By digitally tracking and calculating laytime, you can simplify the negotiations process and more accurately manage demurrage.

With the Laytime Calculator, you can:

- Seamlessly calculate Laytime using existing contract and Statement of Facts data stored in your Platform.
- Calculate laytime after each port call or at the end of the voyage.
- Tailor your Laytime Calculation to reflect each nuance of your contract.
- Incorporate laytime calculations into your broader claims management workflow, including the timebar task list.

YOU MAY ALSO BE INTERESTED IN**IMOS Claims**

Bring increased visibility and contextual advantage to the claims process with comprehensive tracking and alerts, an integrated laytime calculator, and superior documentation.

How to Use It

This functionality comes standard within the IMOS Operations module. No additional license is required. Access the Laytime calculator from the Operations menu or from the Voyage Manager in the system.
