freight traded

Committed to continuous innovation and your success

Ensure optimal trades

Empower your stakeholders with tools to drive profits, reduce operating costs, and manage risk.

Make informed decisions

Understand maritime market analytics and make decisions rooted in validated, contextual data.

Strengthen connections

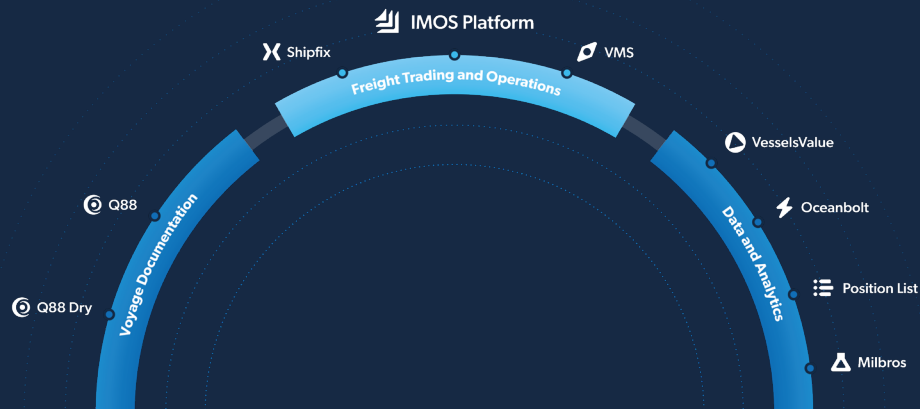

Collaborate with internal and external counterparties, and learn from the Veson Nautical community.

Trusted by over 2,400 organizations across the maritime ecosystem.

A suite of solutions as connected as the global shipping community

Maritime and maritime-adjacent businesses need efficient workflows, accurate information, and quality data to compete. We bring all of these together in one suite of solutions that propels maritime commerce.

Freight Trading and Operations

Shape a more efficient trade, starting at the center.

Our solutions enable comprehensive contract management workflows and extend high-powered decision support to participants of all sizes and complexity on all sides of the trade.

Commercial freight contract management and voyage execution

AI-powered data and communication workflows

Commercial voyage management

Data and Analytics

Make agile, effective decisions with validated market data.

Using an industry-leading data collection and validation process, we give stakeholders quick and easy access to trusted data on global commodities, marine freight, and vessel valuations.

Daily valuations and data on the world's fleet

Port, tonnage, and commodity analytics

Handling and cleaning instructions for 14,000+ commodities

Tracking and availability for market vessels

Voyage Documentation

Standardize the exchange of vessel and voyage documentation.

As the industry's long-established resource for standardized document management, Q88 supports informed operations, enhanced accountability, and regulatory success in the tanker and dry bulk sectors.

Standardized tanker information management

Standardized bulker information management
