# Data Lake

Complete historical data, ready to be leveraged

In a single day, the maritime shipping industry generates roughly 120 million data points related to contracts, vessel movement, cargo locations, and more. Unlock the value of this data through a cloud-native, scalable solution that allows you to interact with and download large amounts of operational data in a highly efficient manner. Conduct analyses, understand cargo locations, and more with comprehensive historical data, compatible with data warehouse, business intelligence, and analytics solutions.

Intuitive

All data stored in the Data Lake is automatically transformed to a standard reporting format, removing the need to change report queries when new features are added.

Accessible

The data stored in the Data Lake is housed in highly available locations, so users can be confident that they are making decisions based on the latest information.

Secure

The Data Lake leverages industry standard encryption ciphers to keep your data secure both at rest and in transit.

Enhance the value of your Veson IMOS Platform system with the Data Lake module.
