

 **IMOS Platform** +  **Oceanbolt**

Integrated vessel data where and when you need it with Oceanbolt Vessel Particulars

Comprehensive vessel data is critical to your ability to make confident decisions, but you shouldn't have to jump from one login to another to access it. With Oceanbolt Vessel Particulars in the Veson IMOS Platform, you can seamlessly search and import vessel data—giving you access to what you need, when you need it.

Data for over 25,000+ vessels that can be accessed directly in key workflows within the IMOS Platform. Minimize vessel data entry time while driving high-quality insights to real-time decision making.

With the Oceanbolt Vessel Particulars + IMOS Platform integration, you can:

Access a high-quality bulker and tanker vessel database comprising of manually curated Q88 data in combination with automated Oceanbolt AIS information.

Import vessels of interest directly to the IMOS Platform during the market insights or estimate stage of the workflow.

Easily leverage primary vessel data throughout the IMOS Platform, which is stored in your data center and automatically updated with vessel changes.

Evaluate decisions and report on a comprehensive set of vessel fields, including class society, TPC, LOA, depth, fuel tank margin, call letters, and more.

In addition to this standard integration, you can leverage the Oceanbolt API to:

Access historical port calls and vessel tracks across the global fleet in Market Insights and Action Cargoes.

Import predictive ETAs into the IMOS Platform across both the estimate and voyage manager.

Incorporate port congestion and expected port days data into your estimates, giving charterers a better view of current realities and enabling more accurate estimates before fixing.

With direct access to data from Oceanbolt Vessel Particulars, vessel fields within the IMOS Platform will be automatically updated to reflect the latest changes.

The following are maintained fields, with dry bulk market fields in navy and wet bulk market fields in navy and blue:

IMO No	Tropical SW Draft	Tropical SW	Vessel Flag	NRT Int'l
Type Code	Winter Draft	Winter	Registry	Panama Gross
Vessel Owner	Normal Ballast Draft	Normal Ballast	Disponent Owner	Suez Gross
Capacity m3	Lightship Draft	Lightship	Operator	Fax
Capacity Bbl	Displacement:	TPC	P&I Club	Bridge No.
Class Society	At Summer	LOA	Hull Type	Email
Vessel DWT	Tropical SW Displ	Beam	Ice Class	SW Summer Draft
Tropical SW DWT	Winter Displ	Depth	Last Dry Dock	At Summer
Winter DWT	Normal Ballast Displ	Fuel Tank Margin	Next Dry Dock	Builder
Normal Ballast DWT	Lightship Displ	Former Name	Next Survey	GRT Int'l
Lightship DWT	Free Board:	Call Letters	TVE Expires	

Discover how integrated vessel data can help you enhance your competitive edge.
