

## ☰ Position List

# Bringing data-driven decision making to your tanker voyage planning

Position List for Principals is a standalone solution that provides principals with a comprehensive view of the marine freight marketplace from a single, central access point. With flexible APIs and data from multiple AIS sources, users can easily access the timely and accurate information they need to make stronger pre-fixture decisions. Position List for Principals' fast setup and user-friendly interface empowers principals to instantly tap into the power of high-quality data of the tanker landscape to enhance their voyage planning process.

### With Position List for Principals, you can:

- **Directly compare your fleet and operations to the competition** and the market at large through purpose-built APIs.
- **Combine AIS data with open positions** to get a full view of tonnage and predict openings without altering your updated positions.
- **Harness predictive search capabilities** to plan voyages more effectively.
- **Easily configure custom export formats** without any third-party support needed.
- **Track market fixtures** without ever leaving the solution using our Cargo and Fixtures feature.
- **Add your own fixtures and visualize data** to support informed decision making.
- **Construct tonnage supply lists and intake analyses** including historical data, and track tonnage supply trends over time based on geography and vessel.
- **Estimate CO<sub>2</sub> and EEOI** on a ship-by-ship basis, based on open positions, estimated consumption, distance traveled and other criteria.
- **Integrate with the Veson IMOS Platform** to incorporate insights on tonnage movements directly from the operations team without the need for email scraping, best guesses, or jumping between systems and spreadsheets.
- **On-the-go capabilities** available through the App.
