

The industry standard for stronger dry bulk decisions

Bringing together Q88's expertise in information management and Veson's heritage of market leadership, Q88 Dry equips dry bulk owners, operators, charterers, and brokers with delivers robust insights around dry bulk vessel particulars, questionnaires, documents, inspections, and more. This information is presented in a centralized, cloud-based format, empowering dry bulk stakeholders to manage, share and collaborate like never before.

With Q88, you can:

View comprehensive, accurate vessel information that is regularly maintained by owners and operators.

Access over 300 charterer and terminal questionnaires, with the ability to easily share via email.

Plan and record inspections as they occur and visualize vessel inspection history and trends to gain new insight.

Centrally manage certificates and documentation to easily track renewals.

Maintain an up-to-date officer matrix, even when onboard the vessel or offline.

Seamlessly integrate with internal systems and industry software solutions to maintain a single source of truth.

Clients we are proud to serve:
