

Q88 > Web Services

Integrate seamlessly with Web Services

Q88 provides a robust library of web services and partners with numerous third party software solution companies so you can work even more efficiently between our platform and your in-house systems.

Custom Integrations:

- ▶ We make it easy for you to integrate our services with your inhouse systems using industry-standard XML web services.
- ▶ Access to your vetting inspection and officer matrix data.
- ▶ Download certificates and questionnaires.
- ▶ Link to vessel particulars, tank plan diagrams, and questionnaire(s) for your fleet.

Software Integrations:

- ▶ Automatically login into your Q88 account and search Q88 databases through 3rd party system.
- ▶ Eliminate double entry through the automation of manual processes.
- ▶ Have direct communication between the 3rd party system and web services.
- ▶ Quickly import, view, and update information on new and existing vessels.
