

At Veson Nautical, client value is the star that guides all that we do. That's why we develop and release more than 500 new features each year to meet the evolving needs of our vast, global client community.

## EU ETS Calculation Precision

Enhancements to the Carbon Calculator adhere closely with EU ETS guidelines. This new functionality increases the precision of the calculated ETS cost, accuracy of ETS percentages, exclude and discount specific vessels, and display port properties.

## Enhanced Modules

- ✓ CHARTERING
- ✓ OPERATIONS

## Do these enhancements apply to you?

Ask yourself these questions to determine how your organization will benefit from these additions to the Veson IMOS Platform:

- ✓ Are any of your estimates or voyages affected by EU ETS?
- ✓ How are you currently capturing ETS percentages?
- ✓ Do you operate any Ice Class vessels or vessels under 5,000 GT?
- ✓ Do you have voyages to excluded Ports of Call under EU ETS that you want to account for automatically?

## Features & Benefits

- Easily capture and apply Pre- and Post-Voyage Port of Call Dropdowns to the EU ETS calculation
- Label vessels as their specific Ice Class and automatically apply a 5% discount for Class IA, IA Super
- Automatically exclude vessels under 5,000 GT from EU ETS
- View/Manage costs with EU ETS Port of Call, STS, and Outermost Region checkboxes available in Port Properties

## Take advantage of the latest IMOS Platform features.
