

At Veson Nautical, client value is the star that guides all that we do. That’s why we develop and release more than 500 new features each year to meet the evolving needs of our vast, global client community.

EU ETS Workflow Coverage

The addition of transfer workflows and other general UI improvements to the emissions tab has simplified allocation settlement processes—enabling users to gain visibility into useful information.

Enhanced Modules

- ✓ TRADING & RISK
- ✓ CHARTERING
- ✓ OPERATIONS

Do these enhancements apply to you?

Ask yourself these questions to determine how your organization will benefit from these additions to the Veson IMOS Platform:

- ✓ Are you already utilizing the EU ETS workflows in IMOS or do you intend to start using them?
- ✓ Are you capturing parts of the EU ETS process outside of IMOS and can that now be moved into IMOS with these latest changes?

Features & Benefits

- Expand Emissions coverage by allowing CO₂ exposure details and emission settlement capture on COA contracts to flow seamlessly to linked liftings
- Replace manual input of dates, periods, quantities, and allowances by defaulting to the settlement information in the contract
- Increase visibility by selecting the correct EU Registry Accounts directly from the address book

Take advantage of the latest IMOS Platform features.
