

At Veson Nautical, client value is the star that guides all that we do. That's why we develop and release more than 500 new features each year to meet the evolving needs of our vast, global client community.

## Fuel Modes

As new builds and retrofits of vessels emerge, more demand is placed on voyage estimates. Fuel Modes provides more control of estimated consumption by allowing various configuration behaviors under vessels—increasing the accuracy of bunker planning and the precision of P&Ls.

## Enhanced Modules

- ✓ CHARTERING
- ✓ OPERATIONS

## Do these enhancements apply to you?

Ask yourself these questions to determine how your organization will benefit from these additions to the Veson IMOS Platform:

- ✓ Do you or will you operate dual fuel vessels?
- ✓ Are you looking for more control and flexibility in the estimated consumption behaviors of a vessel during a voyage?

## Features & Benefits

- Define new sets of speed/port consumption tables using the pre-existing vessel fuel types
- Select consumption mode at a leg level on both Estimate and Voyage itineraries
- Drive accurate and precise voyage bunker consumption

## Take advantage of the latest IMOS Platform features.
